※ 첨부 1. 월드뱅크와의 세미나 공동 개최건 협의 관련 문서

Participants will be from India and the other seven South Asian countries, and will be selected on the basis of their roles in past, on-going or forthcoming projects on cultural heritage and historic cities management. Presenters will include representatives of cities or agencies that have successfully implemented historic city regeneration internationally, as well as academia. It is expected that Italy, as India's partner in the MDTF, will provide speakers and case studies. Others presenters will be selected from various regions of the world and relevant institutions.

The conference will be the opportunity to show-case projects related to cultural heritage and historic cities in the World Bank's portfolio and pipeline, the technical assistance activities of UNESCO in this area, the progress made by the two pilot programs supported by the MDTF in the region (India and Bhutan), the results of previous studies supported by the Italian Trust Fund for Culture and Sustainable Development in South Asia, as well as significant initiatives by national and local governments, other specialized agencies and non-governmental organizations (Aga Khan Trust, GIZ, INTACH, etc.) in the South Asia region, and other agencies.

Appropriate visual and written documentation will be prepared for the conference, the format of which will be highly interactive. Related materials and results will be disseminated through a variety of web-based communication tools, and will include a final comprehensive publication.

The design and organization of the International Conference is the responsibility of a joint working group which includes representatives of the four key institutions, and headed by the World Bank. It is currently seeking the support of other international institutions interested in contributing both financial and technical resources to the design and implementation of the International Conference on Cultural Heritage and Historic cities in South Asia.
